

HASSAN RAZA

Manual QA / SQA Engineer

Nadir Abad, Lahore Cantt, Pakistan | qa.hassanraza@gmail.com | +92 302 0533331 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Manual QA/SQA Engineer with 1+ year of experience testing web and mobile applications across fintech, crypto, and marketplace platforms. Skilled in Functional, Regression, Integration, System, and API Testing (Postman, Swagger, Insomnia) with a strong grounding in SDLC and STLC. Experienced in end-to-end test planning and execution, defect lifecycle management through Jira, and test coverage tracking in TestRail within Agile/Scrum teams. Proven ability to translate client requirements into clear test cases, execute cross-browser and cross-platform release testing, and maintain accurate QA documentation. Recognized for attention to detail, cross-functional collaboration, and consistent delivery of stable, high-quality releases on schedule.

CORE TECHNICAL SKILLS

Testing Types: Functional, Regression, Integration, System, Smoke, Sanity, Exploratory, Release, Cross-Browser, Cross-Platform, Compatibility, UI/UX, Web & Mobile Application Testing

API Testing: Postman, Swagger, Insomnia, REST APIs, JSON, HTTP Request/Response Validation, Endpoint & Data Integrity Verification

Test Management & Bug Tracking: TestRail, Jira, Asana

Methodologies: SDLC, STLC, Agile, Scrum, Sprint Planning, Defect Lifecycle Management, Risk Analysis

QA Documentation: Test Plans, Test Strategy Documents, Test Cases, Test Scenarios, User Flows, Defect/Bug Reports, Release Validation Reports

Analytical Skills: Requirement Analysis, Root Cause Analysis, Quality Metrics, Test Coverage Analysis

Soft Skills: Cross-Functional Communication, Critical Thinking, Attention to Detail, Team Collaboration, Time Management, Process Improvement, Adaptability

PROFESSIONAL EXPERIENCE

Junior SQA Engineer — FoliumAI

Feb 2025 – Present

Manual SQA Engineer testing web and mobile applications, performing API testing, and producing QA documentation to support high-quality, reliable releases.

- Executed API testing using Postman, Swagger, and Insomnia to verify endpoint functionality, request/response accuracy, and data integrity across 100+ endpoints.
- Designed and executed functional, regression, integration, and API test cases across four concurrent projects, sustaining consistent application quality throughout 20+ release cycles.
- Authored test strategy documents and user-flow diagrams that aligned engineering, product, and design teams on testing scope and coverage ahead of each release.
- Diagnosed, documented, and tracked 300+ defects in Jira, partnering with developers through the full defect lifecycle to accelerate resolution and reduce reopen rates.
- Delivered manual QA coverage across four production products: Foster Ferret, WZRD Pro, SeedFunds, and ShareMundo supporting on-time, defect-minimized releases.

SQA Engineer (Intern) — Kreatorz.co

Sep 2024 – Jan 2025

Performed manual testing for mobile and web applications, progressing from intern to Junior SQA Engineer while building core QA processes and defect-management skills.

- Built and executed functional and regression test cases for three production applications, maintaining consistent quality across releases.
- Logged and tracked defects in Jira with clear, reproducible reports, cutting developer triage time and speeding up fix turnaround.
- Partnered with developers to troubleshoot issues, validate fixes, and confirm resolution prior to release sign-off.
- Provided manual QA coverage for a ride-share application, the Ryvato iOS app, and an attendance management system.

PROFESSIONAL PROJECTS

Foster Ferret — Web & Mobile Application

- Tested a multi-functional wellness platform spanning check-ins, AI chat, Shopify integration, file storage, one-to-one chat, and multi-role dashboards.
- Translated client requirements into detailed test cases and QA documentation to guide test coverage.
- Ran functional, regression, and UI/UX testing across multiple browsers to confirm a consistent user experience.
- Verified API behavior via Postman and tracked defects through Jira, supporting stable, on-schedule releases.

SeedFunds — Web & Mobile Application

- Tested a fund allocation and vendor-management platform featuring Stripe payments, AI chat, Google Maps integration, and order tracking.
- Authored and executed test cases covering functional, regression, and integration testing.
- Validated UI/UX consistency, timeline views, and analytics dashboards for accuracy across web and mobile platforms.
- Conducted API testing using Insomnia and managed end-to-end defect reporting through Jira.

WZRD Pro — Web Application

- Tested a fintech platform covering admin dashboards, subscription management, user permissions, crypto learning modules, portfolio creation, and a rewards system.
- Built and executed test cases for functional, regression, and integration testing across the release cycle.
- Verified security controls, user permissions, and data integrity alongside dashboard and subscription-workflow accuracy.
- Performed API testing using Insomnia to validate backend responses ahead of release.

EDUCATION

Bachelor of Science in Computer Science

Oct 2020 – Jul 2024

Lahore Garrison University, DHA, Lahore

Relevant Coursework: Operating Systems, Object-Oriented Programming, Data Structures & Algorithms, Networking, Database Management, Network Security, Software Engineering Concepts, System Design Fundamentals
